1 Overview

Mobile Monitoring App is a monitoring app available for Android only. The app uses your device's internet connection to send data logs collected from your phone to a desktop-dashboard for review. The app is absolutely free to download.

WHY USE MOBILE MONITORING APP:

- Child monitoring
Mobile Monitoring App can be use by parents/guardians to monitor activities that their minor children get up to.
- Employee monitoring
Companies that give their employees mobile devices can use the *Mobile Monitoring App* to monitor any unauthorized activities that employees may get up to.

2 Configuration

3 Installation

4 Getting Started

Before you download and install *Mobile Monitoring App*, make sure *Mobile Monitoring App* supports your phone type. Please check this [here](#).

To download *Mobile Monitoring App*, visit this [link](#) on your phone. Once installed, locate the app icon and run the app.

- Terms and Conditions
Read the 'Terms and Conditions' on startup and only after accepting them can you proceed, if you don't accept you can not use the app.
- Register new user
First time users need to register after accepting the 'Terms and Conditions'. The user needs to provide a working email address and create a new password they will use to login with in future.
- Login as existing user
Existing users need not to register, simply click 'Existing user' and then login in order to subscribe the new device.

5 Using the App

The app runs in the background through out its installation; the user never gets to directly interact with the app there after.
